

November 6, 2023 for grant consideration: A letter of support:

FentanylFathers.org presented to our High School and gave our students a compelling message. Because they were bereaved parents, our students seemed respectfully engaged.

The movie "Dead On Arrival" seemed to hold their attention. Their Naloxone demonstration appeared adequate enough to show them what to do in case of witnessing an overdose. The latest facts with a powerpoint deck further backed up their message to not take an unprescribed pill under any circumstances because "8 in 10 have lethal fentanyl."

Finally - we also noticed they measure the student's awareness lift results with a QR coded survey.

Our students walked away more informed about fentanyl so that they can avoid being poisoned by it as they move on with their lives. At the close, all of them said together "I'll never try so I'll never die from Fentanyl."

I recommend any High School to consider hosting them - our students were the beneficiaries of this life saving message.

Sincerely,

JA DORRIS
